Forecast for Thursday 21 Jan 2021

Weather: Heavy sleet and snow will continue overnight but will become more showery by dawn with a few drier periods especially in the west. The rest of the day will be quite dull and cloudy with a few outbreaks of sleet and snow. There may be some drifting of snow in the westerly gales and access roads could easily become blocked.

Chance of cloud free mountain/hill tops above 600m: 10-20% there will be a lot of low cloud associated with snow and sleety outbreaks, cloud will break in the afternoon increasing the chance to 30-40% and perhaps more chance in the west.

Visibility: Generally very poor visibility with extensive low cloud base 200m and upwards, this will lift in the west in the morning to 600m. Visibility will improve in the afternoon as cloud lifts and there are less wintery outbreaks.
